General Information

Description

Developer of a data-oriented platform designed to provide training and validation data for AI applications. The company's platform offers a data-centric, end-to-end service to manage the entire machine learning lifecycle by combining technology to develop complex datasets, enabling clients to accelerate the development of artificial intelligence applications through ground truth data.

Most Recent Financing Status (as of 18-Aug-2023)

The company raised an undisclosed amount of venture funding from Section 32, Wormhole Capital in approximately April 2023. Atlant Ventures and Junipero Capital Management also participated in this round.

Company signals data was calculated against 2031100 companies within all companies.

Company Signals Population: Company Signals data is tracked for active companies (i.e. have not gone out of business) that haven't been exited from VC, PE, or Incubator/Accelerator. Social media presence is tracked only for companies that have a Facebook/Twitter account; web presence is tracked only for companies whose websites are tracked by SimilarWeb and Majestic.

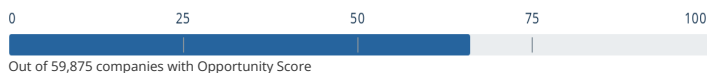

VC Exit Predictor

Leverage PitchBook's algorithmic insights to compare investment opportunities and forecast the exit trajectories of venture-backed companies.

Opportunity Score

Percentile comparison of the expected return on investment for Scale AI compared to other venture-backed companies. Calculated using Exit Type probabilities, the company's stage, and PitchBook's historical returns data.

66 / 100

Exit Type

Evaluates VC-backed companies' likelihood of a successful exit for investors, and the most likely exit type. Generated by a machine learning algorithm, leveraging Market Positioning, Company Performance Indicators, Active Investors, and Deal Activity.
